Explore the world through sensory play

East Coast Nursery have been a family-run company for more than 55 years, supplying an award-winning range of baby products.

The whole East Coast range is carefully designed in the UK; beautifully made and thoroughly tested to ensure you receive the best quality products for you and your baby. Our collection includes furniture, mattresses, highchairs, changing mats and developmental toys.

We're passionate about innovation, and in our unique partnership with Baby Sensory™, we've combined our expertise in baby products with their knowledge of and understanding of the way babies learn and grow, to create the "Say Hello" toy collection.

For your new world

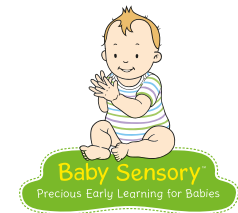

Baby Sensory™ classes are a magical world of sensory learning, and a great way for babies and parents to have fun and learn together.

Baby Sensory™ offer classes from birth to 13 months, where parents and babies spend an hour singing, playing, relaxing, exploring and learning together. Baby Sensory™ classes are attended by first and second-time parents, grandparents, and over 35,000 babies each year. The programme has won multiple awards in the UK and worldwide since 2008.

This beautiful song was the inspiration for the toy collection, and the seven colourful characters can be found throughout the range. Some products even play the 'Say Hello' tune.

"Say Hello" toys are a wonderful way to stimulate your baby's senses, whether they are used alongside Baby Sensory™ classes, or just because you love them.

Every class starts with the 'Say Hello To The Sun' song, complete with simple handsigns that babies learn to copy. In the song, everyone says 'Hello!' to the sun, moon, corn, stars, rain, flowers, and friends.

The “Say Hello” range of intelligent toys was developed with Dr Lin Day of Baby Sensory™, and based on over 25 years of research into the way babies learn and develop. With her input at every stage, the range has been expertly designed to stimulate thinking, feeling and learning, and encourage healthy social-emotional development in babies and toddlers, by inspiring them to explore the world through sensory play.

Designed to encourage:

Dr Lin Day

SOCIAL-EMOTIONAL DEVELOPMENT

Friendly character toys help baby begin to learn important skills like making friends and understanding others' feelings.

MOVEMENT

Kicking, batting and reaching for toys will strengthen your baby's muscles, preparing them for crawling and walking.

CALMING & SLEEPING

Gentle movements of swaying toys, and sleepy-faced characters help baby learn to calm themselves and settle to sleep.

HAND-EYE COORDINATION

By exploring with their hands, grasping and batting, your baby develops their coordination for later skills like eating and writing.

THINKING & UNDERSTANDING

Objects that make a noise or change when played with will help your baby to understand that their actions affect their surroundings.

COMMUNICATION

Friendly characters and smiling faces encourage baby to babble and begin those first conversations, imitating adults' behaviour.

EXPLORING

Lay the foundations for your baby's big adventures with textures, sights and sounds to discover – sparking their curiosity.

ENGAGING THE SENSES

Sensory toys rich in sights, sounds, textures, smells and tastes stimulate brain growth and build a strong foundation for future learning.

CREATIVITY

Features and characters that encourage imaginative play let your baby use their creativity for problem solving and role-playing.

CONFIDENCE

Touching, shaking, pushing and rolling objects will teach your baby about the way they can influence the world around them.

TUMMY TIME

One of the most important activities for small babies, to strengthen muscles, encourage head lifting and prepare them for crawling.

4-in-1 Discovery World

- * Delightful multi-sensory gym converts through four modes of use: play gym, tummy time mat, crawling tunnel and play mat
- * Supportive tummy time cushion
